Инструкция по сборке и эксплуатации мебели

БОСТОН Кровать КР-002 (Спальное место 1.6 x 2.0 м)

Габариты: Д.1 690 x В.1 016 x Г.2 062 мм

Furniture assembly and operation instructions

BOSTON Bed KR-002 (Sleeping spot 1.6 x 2.0 м)

Dimensions: L.1 690 x H.1 016 x D.2 062 мм

Уважаемые покупатели!

Рекомендуем доверить сборку Вашей мебели профессиональным сборщикам

Dear customers!

We recommend entrusting the assembly of your furniture to professional assemblers

При получении рекомендуется проверить мебель на предмет ее комплектности и внешних качественных признаков. Следует вскрыть упаковку, осмотреть лицевые панели, зеркала, стеклянные элементы, проверить наличие и комплектность фурнитуры, убедиться в отсутствии видимых дефектов. Необходимо помнить, что принятие мебели без указания на явные недостатки, которые могли быть обнаружены при обычном осмотре, лишает покупателя права впоследствии предъявлять по ним претензии. При этом недостатком или дефектом мебели не считаются:

- ## Общие условия эксплуатации и ухода за мебелью

10. В процессе эксплуатации мебели резьбовые соединения следует периодически подтягивать.

Гарантийные обязательства

Изготовитель гарантирует соответствие мебели требованиям ГОСТ 16371-2014, ГОСТ 19917-2014 при соблюдении условий транспортирования, эксплуатации, хранения и сборки. Гарантийный срок эксплуатации изделия - 24 месяца с даты производства. Гарантии не распространяются на изделия поврежденные при перевозке, а также при не соблюдении правил сборки, эксплуатации и хранения, изложенных в настоящей инструкции. Все виды деталей изображены схематично и могут отличаться от оригиналов. Производитель оставляет за собой право вносить изменения в конструкцию, не ухудшающие ее эксплуатационные характеристики.

«Маркировочный ярлык» отрезать по линии и приклеить на заднюю стенку изделия по окончании сборки.

Спасибо за покупку!

- **Acceptance of Furniture**

Upon receiving, it is recommended to inspect the furniture for completeness and visible quality attributes. The packaging should be opened to check the front panels, mirrors, glass elements, the presence and completeness of hardware, and to ensure there are no visible defects. It is important to remember that accepting furniture without noting obvious defects that could be detected during a standard inspection deprives the buyer of the right to make claims regarding these defects later. However, the following are not considered defects or flaws in the furniture:

- The presence of certain features in its elements determined by the manufacturer's stylistic intent in the selection of raw materials or associated with the natural origin of the materials used, including minor differences in texture and/or shades.
- Slight differences in the color shades of upholstery fabrics, as well as coatings made of artificial or natural leather.
- Small variations in color shades and differences in the pattern and/or decoration. Wrinkles in upholstery materials of soft elements resulting from packaging and/or transportation that disappear after smoothing by hand are also not considered defects.

General Conditions for Use and Care of Furniture

1. Furniture must be used in dry and warm rooms not subject to temperature fluctuations, equipped with heating and ventilation, with air temperature not lower than +10°C and not higher than +40°C, and relative humidity between 45-75%. Significant deviations from these conditions lead to a noticeable deterioration in the furniture's quality and damage.
2. Do not place heating devices (stoves, ovens, lighting elements, etc.) near the facades, as contact with surfaces or air temperatures exceeding 80°C can cause melting, deformation, and detachment of PVC plastic from the facade base. Avoid high humidity. It is recommended to install forced exhaust ventilation in the area near the stove.
3. To prevent warping and swelling of chipboard/MDF parts, protect their surfaces from prolonged exposure to moisture. Liquids that can dissolve plastics or PVC film (acids, solvents, alcohol, acetone, gasoline, etc.) must not come into contact with the surfaces.
4. Protect facades from mechanical damage that may result from contact with hard objects or abrasive powders.
5. To avoid scratches, do not subject the printed design on facades with photo printing to any mechanical impact.
6. Distribute weight evenly in kitchen wall-mounted cabinets and sliding drawers to maintain the balance of sliding parts. Items on shelves should be arranged as follows: heavier items closer to the edges (cabinet walls), lighter items toward the center. Avoid exceeding the static vertical load limits: for sliding kitchen drawers made of chipboard – no more than 5 kg, and for cabinet and table shelves – no more than 8 kg. Do not apply excessive force when operating sliding drawers and doors.
7. Sections with chipboard shelves are intended for storing dry dishes and kitchen utensils. Special sections with metal shelves and a tray installed underneath are designed for storing wet dishes.
8. Prolonged exposure to direct sunlight is not allowed, as it may lead to color changes on furniture surfaces or upholstery material.
9. After 6 months of using the furniture under load, certain mechanical parts such as hinges, guides, locks, etc., may lose the optimal adjustment performed during the furniture's assembly and installation. Lubricants in mechanical units may dry out over time and lose their properties. These issues can manifest as difficulty or creaking when opening doors, unfolding mechanisms, or sliding drawers. Do not apply excessive physical force in such cases; instead, make the necessary adjustments to the hinges or lubricate the moving parts of the mechanisms with special lubricants.
10. During the use of the furniture, threaded connections should be periodically tightened.

To keep and maintain your furniture in good condition over the long term, we recommend reading the detailed care and maintenance instructions available on our website mcstyle.ru in the "CUSTOMERS" section in the website's header.

Warranty Obligations

The manufacturer guarantees that the furniture meets the requirements of GOST 16371-2014 and GOST 19917-2014, provided that the conditions of transportation, use, storage, and assembly are followed. The warranty period for the product is 24 months from the date of manufacture. The warranty does not cover products damaged during transportation or those not assembled, used, or stored according to the rules outlined in this manual. All types of parts are depicted schematically and may differ from the originals. The manufacturer reserves the right to make changes to the design that do not impair its performance.
