For the occasional cardio workout at home, the ENERGETICS PR 3200p is a value treadmill with a 1.25 HP motor and a maximum belt speed of 12 km/h (adjustable in steps of 0.1 km/h). The incline of the belt is manually adjustable (3 levels). The onboard computer offers 12 pre-set workout programs and tracks and displays several indicators like speed, time, distance, calories, and the pulse, which is measured straight off the handlebar sensors. For safety and storage reasons, the treadmill can be folded. The PR 3200p treadmill is designed for users weighing up to 100 kg and weighs only 37.5 kg once out of the box.
