

HERE'S SILVER-i. THE WORLD'S FIRST AIR COOLER WITH MULTISTAGE AIR PURIFICATION.

Control the air inside your homes.
Breathe new life into your world.

Most of the factors that affect indoor air quality are invisible. This can worsen the health and comfort of your family and can have long-term health hazards. This is why Symphony has come up with a product that protects you from all such pollutants and give you fresh, pure and cool air.

Silver-i with i-Pure technology is Symphony's definitive response to the ever worsening quality of indoor air due to increasing pollution. Welcome to pure air.

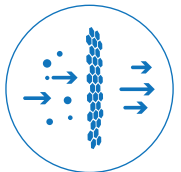

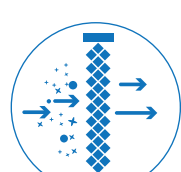

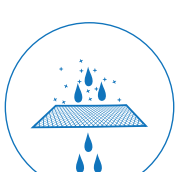

SILVER i
i-PURE
 TECHNOLOGY
 World's first air cooler with multistage air purification

Care. Through pure air.
 Symphony Silver-i comes with i-Pure, a multistage filtration system that cleans a full spectrum of airborne pollutants and harmful micro-organisms. Each of the filters has a specific function and is powered with a specific technology that removes the impurities from the incoming air.

THE MULTISTAGE FILTERS OF i-PURE.

 <p>TiO₂ FILTER This TiO₂ coated filter attracts and reacts with various allergy inducing agents – allergens, and deactivates them.</p>	 <p>ANTIBACTERIAL FILTER Antibacterial filter is made of carbon fabric, and treated with special anti-microbial chemicals that arrest and destroy the harmful bacteria and various micro-organisms.</p>	 <p>ACTIVATED CARBON FILTER Activated carbon filter effectively adsorbs odours, smoke, chemicals, fumes and various volatile organic compounds from the indoor air, including life-threatening chemicals like carcinogenic elements.</p>
 <p>PM2.5 WASH FILTER The air is washed and cleansed while passing through this special cellulose based filter with flowing water curtain. Here, the air is stripped of the impurities and what remains is pure and crisp air.</p>	 <p>PRE-FILTER Pre-filter makes the air healthy by eliminating micro-particles such as pollen, dead skins, dust mites, pet dander, mold spores, etc.</p>	 <p>PU FILTER PU filter collects the impurities present in the water that circulates through the system. This filter keeps the water absolutely clean, ensuring active washing and filtration of air.</p>

THERE ARE AIR PURIFIERS
THAT PURIFY THE AIR.
AND THERE ARE COOLERS
THAT COOL THE AIR.
**HERE'S SILVER-i
THAT DOES BOTH.**

Silver-i comes with a fully removable water tank. A first-of-its-kind feature that allows you to easily fill water and clean the tank regularly for improved hygiene in your living space.
