

Волшебных страниц для раскрашивания

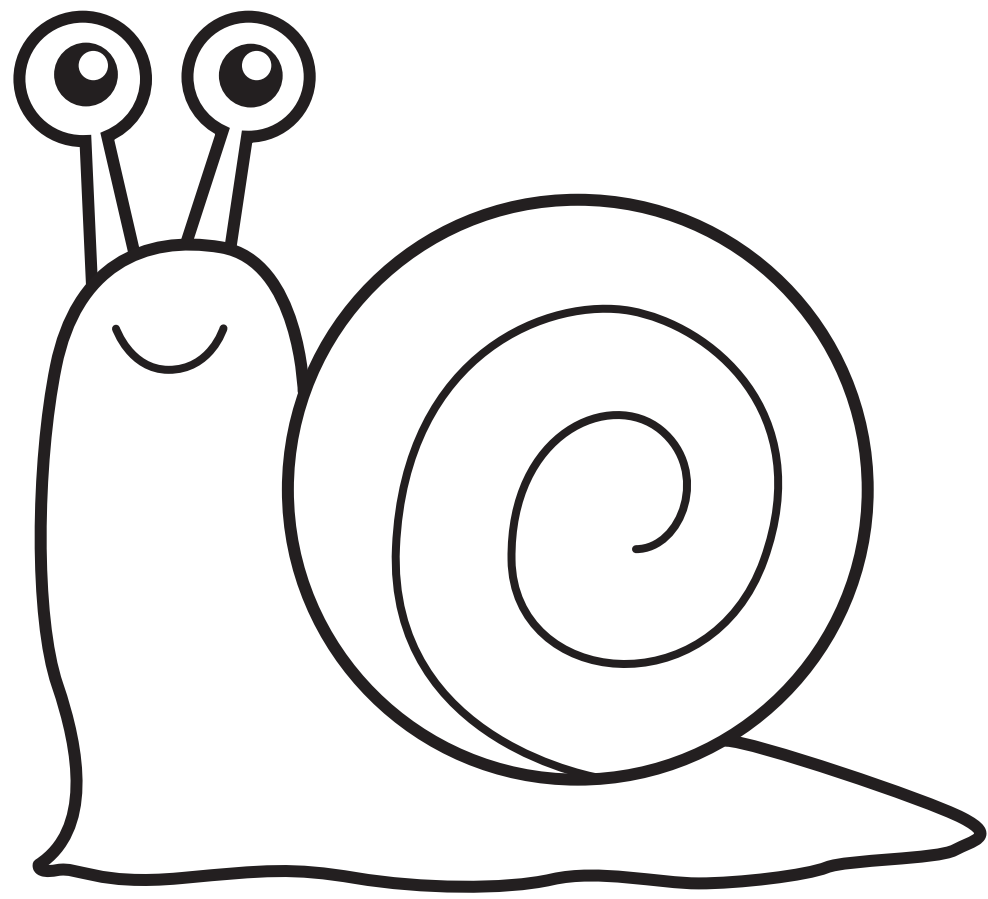

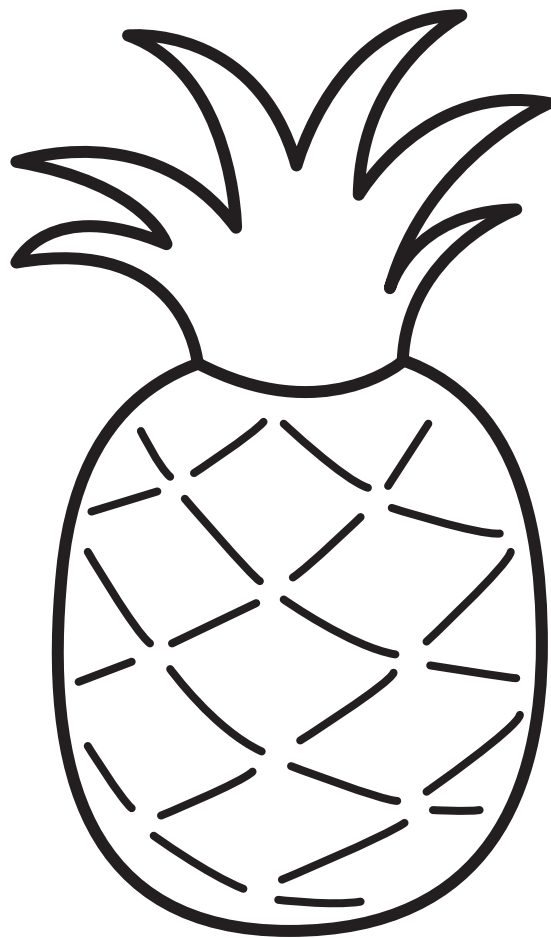

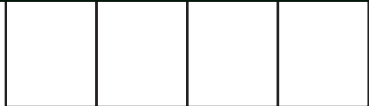

Советы по печати (как правильно распечатать Волшебные страницы для раскрашивания)

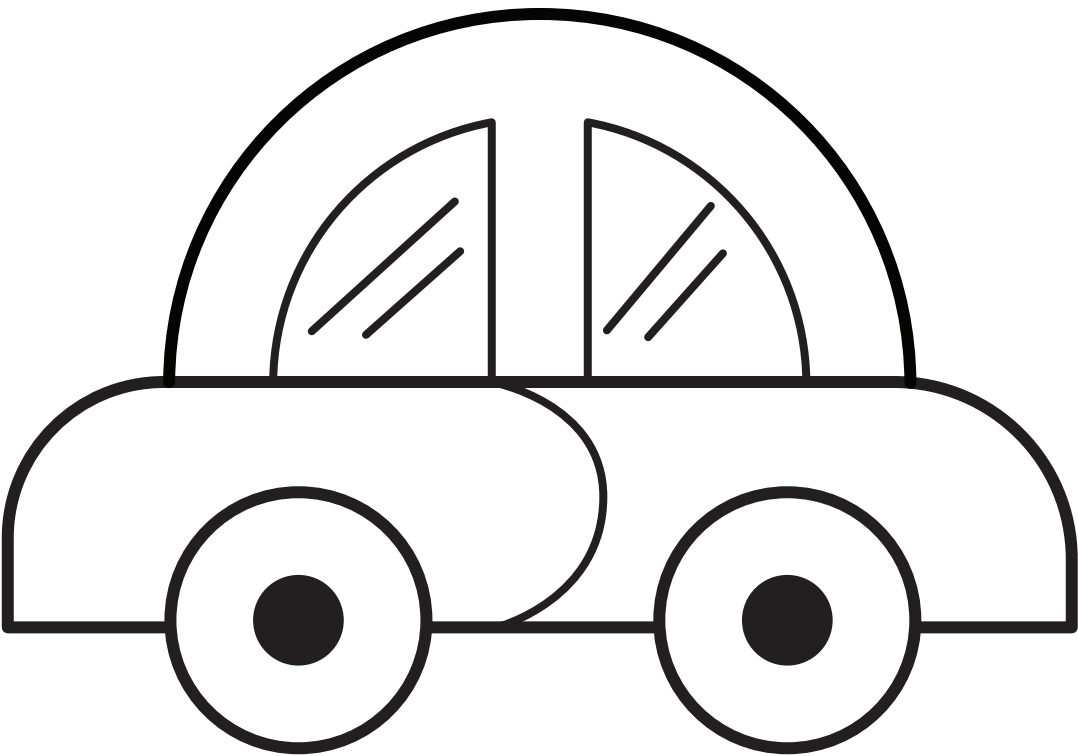

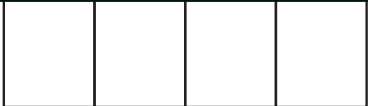

После того, как будет загружен файл для печати, ознакомьтесь со следующей информацией для печати **Волшебных страниц для раскрашивания**.

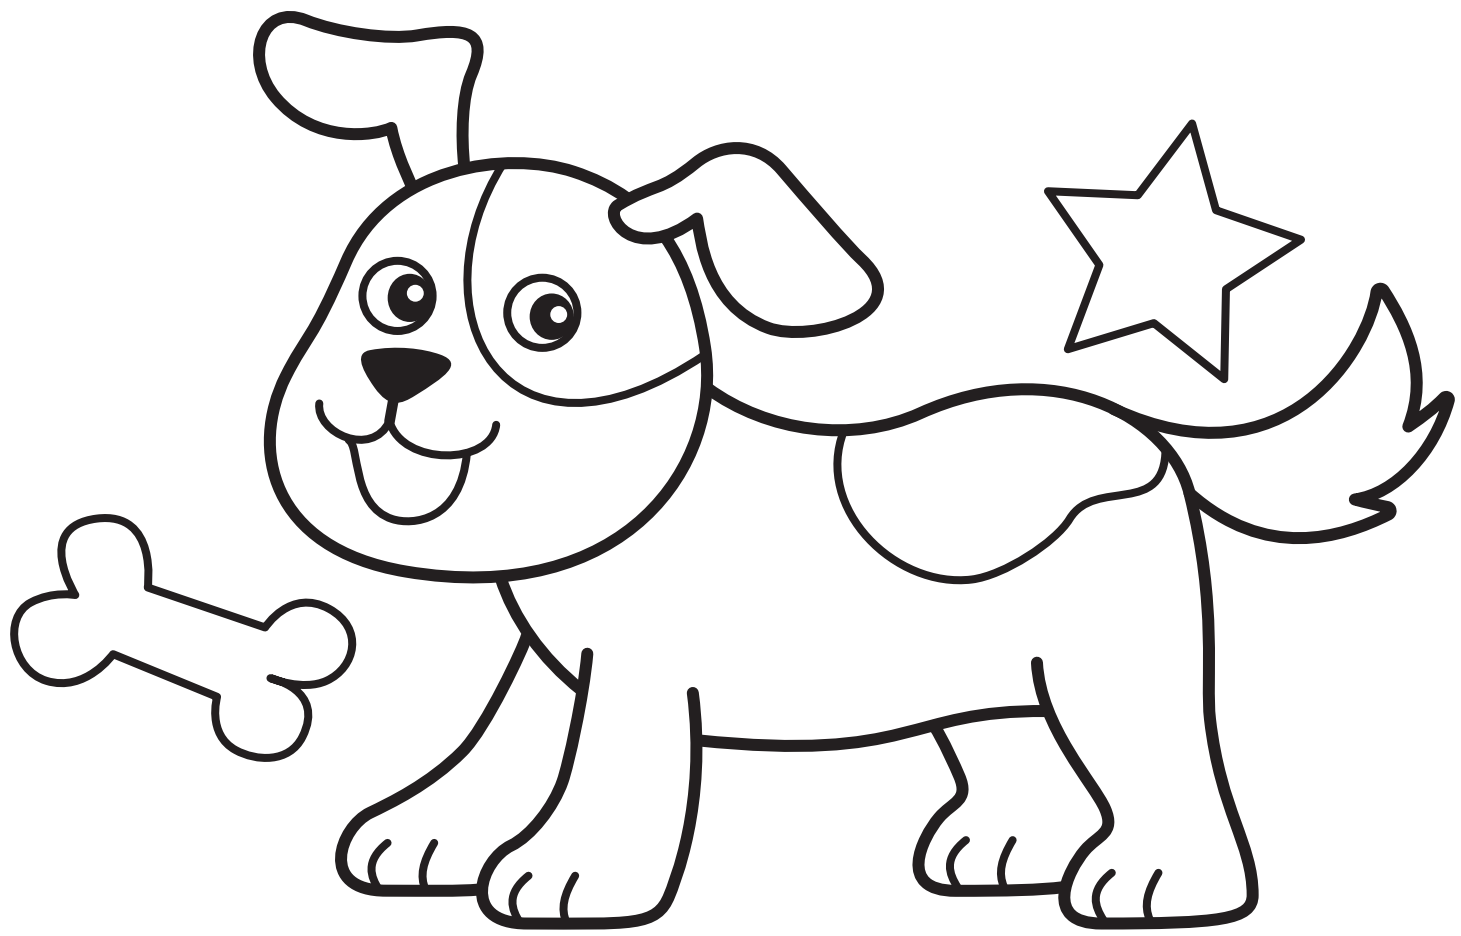

- Установите параметр масштабирования бумаги в значение "нет" или выберите в качестве параметра для печати "Фактический размер".
- Удостоверьтесь, что размер бумаги установлен как А4.
- Установите параметр ориентации бумаги - Альбомная.
- Используйте обычную бумагу для печати. Устройство не распознает Волшебные страницы для раскрашивания, если используется глянцевая или фотобумага.
- Убедитесь, что на принтере не установлено значение "эко печать" или режим печати в сером цвете, так как при этом будет задействовано недостаточно черных чернил, необходимых для распознавания страниц планшетом DigiArt.
- Обрежьте изображение так, чтобы оно поместилось на области подсвечивающихся точек и белой поверхности Планшета.
