**\*75 days:** In tests carried out in a 120m household environment, where lived a three-person family with one pet, and on a robot vacuum cleaning once a day before returning to the base station for dust collection, the dust bag waste volume is measured every five days and the dust bag is filled  $\geq$  75 days without emptying. Data comes from Xiaomi Internal Labs. Actual results may vary.

**\*3 hours hot air drying:** The drying temperature, drying time, drying rate, etc. are tested in the environment of 25°C and 55%RH. Result shows that the mop drying rate is above 99% after 3 hours of continuous drying. Data comes from Xiaomi Internal Labs. Actual results may vary depending on different using scenarios.

**\*5200mAh** is the battery's nominal capacity.

**\*160 minutes of battery life:** When set to Vacuuming and Mopping under Standard mode, and fully charged. Data comes from Xiaomi Internal Labs. Actual results may vary.
